

SNAKES

Have you seen snakes???

How do they look?

What do they eat??

Where do they live???

What sound does a snake make??

Did you know that snakes don't have an ear and they don't have a nose

Imagine a boy without a nose and an ear.. How will he hear and smell.

Can you believe snakes smell using their tongue. It flicks its long, forked tongue to pick up smell from the air, ground, or water. The tongue carries the smelly molecules back to two small openings in the roof of the snake's mouth to identify the smell.

Snakes don't have external ears to hear. Instead, bones in their lower jaw pick up vibrations in the ground or water. The vibes trigger signals in the snakes' brains and helps to what it is

Eggs

Rats

Rice

Small birds

What do snakes eat??

Fruits

Vegetables

Snakes

Fish

Eggs

Rats

Small birds

What do snakes eat??

Snakes

Fish

Most snakes live off of insects, rodents, birds, eggs, fish, frogs, lizards and small mammals.

All snakes swallow their food whole. They don't have teeth to chew like us

Where do snakes live??

Snakes are found in many habitats including in the **water, forests, deserts** and **grasslands**.

Did you know there are
venomous and non
venomous snakes?

By the way, what's venom??

Venom is a poisonous secretion by animals typically injected into prey or aggressor by biting or stinging.

Their venom can kill and cure.

Venomous snakes inject venom to paralyze or kill victims before devouring them. But scientists have also discovered that the same poison that causes awful symptoms—and even death—in people can be turned into medicines.

MILKING THE SNAKE TO MAKE ANTI VENOM.

Have you seen a snake bite..

First aid for a snake bite..

- Call for emergency assistance immediately if someone has been bitten by a snake.
- While waiting for emergency assistance:
 - Wash the bite with soap and water.
 - Immobilize the bitten area and keep it lower than the heart.
 - Cover the area with a clean, cool compress or a moist dressing to minimize swelling and discomfort.
- Give **Anti venom**.

Spectacled Cobra- Venomous

Common Krait- Venomous

Saw-Scaled Viper- Venomous

Rat snake- Non Venomous

India Python- Non Venomous

Sand boa- Non Venomous

And many more.....

Now... lets watch a video!!

Will you all watch carefully..

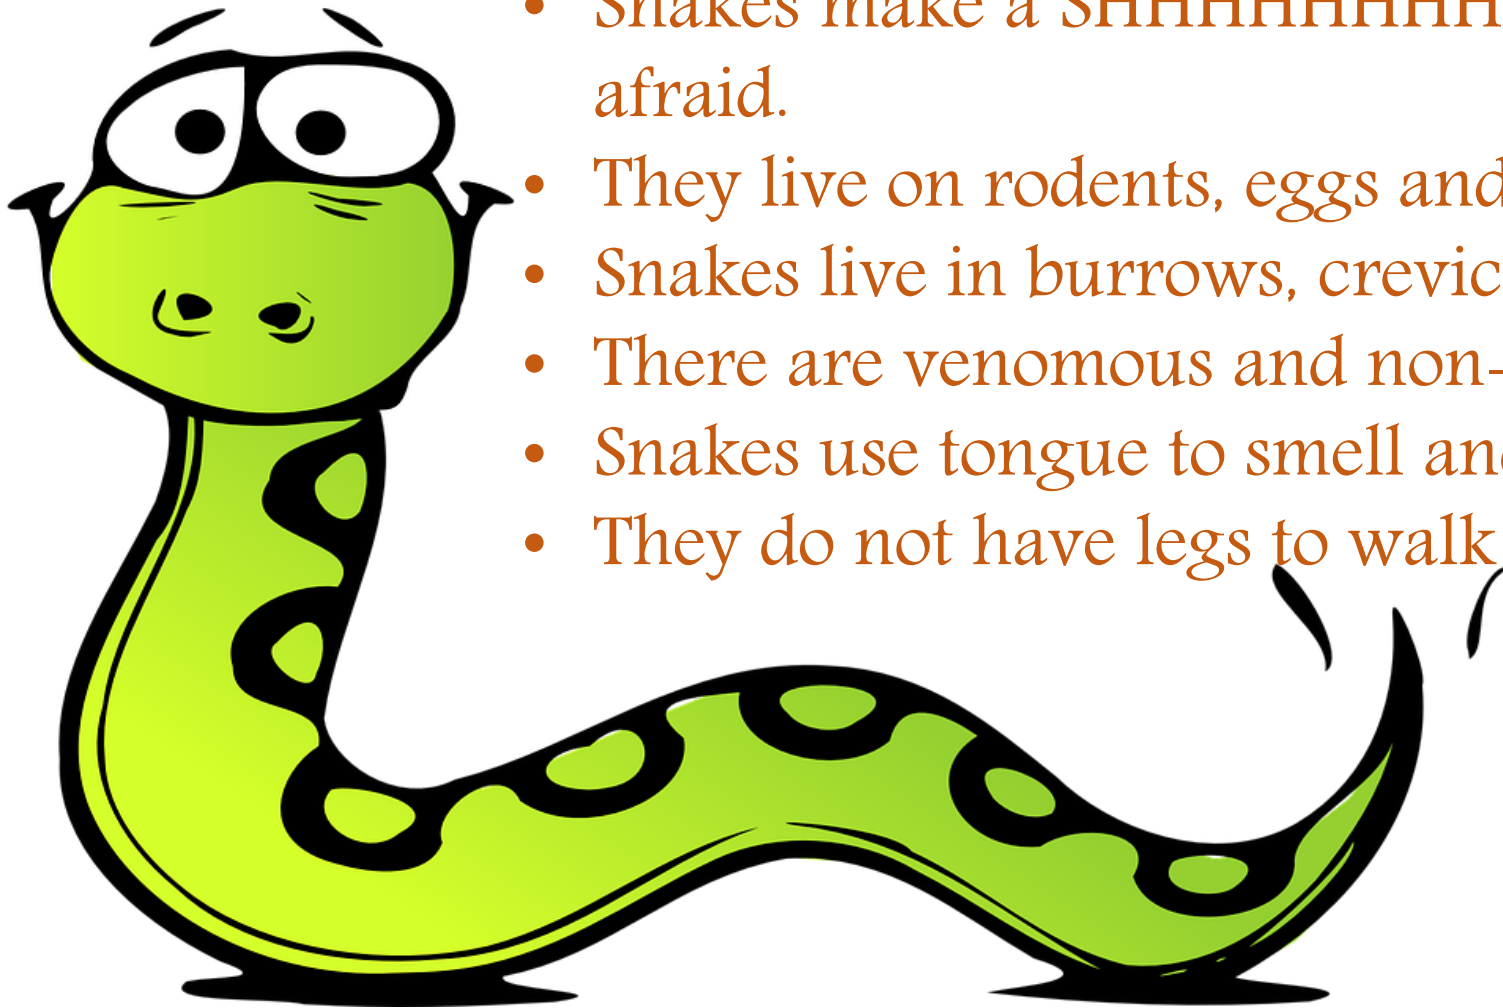

Can we now summarize
what we have learned..

All of you.. Share one thing
that excited you about snakes
to the teacher..

Some points to remember

- Snakes are reptiles
- Snakes make a SHHHHHHHH..... sound when they are afraid.
- They live on rodents, eggs and small birds/animals
- Snakes live in burrows, crevices of rocks and trees
- There are venomous and non-venomous snakes
- Snakes use tongue to smell and jaw to hear
- They do not have legs to walk they crawl on the ground

Have you heard of Khalbeliyas..

A Khalbeliya snake charmer

Khalbeliya dance performers
